

Discussion Points

October 2012 SRST Meeting

Items for Consideration

- Dredging
- Habitat Monitoring
- Pilot Studies – and other options
- Discrete Mercury Sources
 - Discharges from Plant Site
 - Different Sources; Different Impact Areas
 - Adaptive Management tools

Items for Consideration (cont'd)

- Remedies
 - “No Regret” options
 - Consensus on Remedies
 - Less disruptive or invasive technologies
- Effective Targets and Goals
 - 0.3 ppm in fish target – as an example
 - Goals may be more achievable in some areas (South Fork vs. South River)

Items for Consideration (cont'd)

- Monitoring

- Is the key to measuring effectiveness of remedies and restoration
- Volunteers for Monitoring Task Team

- Technologies

- Are there other technologies we should revisit?
- Manipulation of methylation?
- This applies to remediation and to data analysis (GIS)

Other Issues noted

- Land Use and Ownership
- Meeting Format
 - “Program Review” for October meeting
 - Other format options?
- Anything Else???
 - Contact Don, Ralph, or Mike
